## 1＂－SOFT DOME－ 25 mm

## ＂Catenary＂profile

Replaceable voice coil assembly $1^{\prime \prime}$ impregnated textile dome Injected polymer face plate reinforced glass fiber High efficiency－ $92 \mathrm{~dB} / \mathrm{W} / \mathrm{m}$ Ferrofluid cooled voice coil

> Dôme profil＂chainette＂ Equipage mobile interchangeable Dôme 25 mm textile
> Face polymère injectée renforcée fibre de verre
> Haut rendement－ $92 \mathrm{~dB} / \mathrm{W} / \mathrm{m}$
> Bobine refroidie par ferrofluide

The＂catenary＂profile on our textile diaphragm provides maximum stiffness at the tip of the dome．The moving mass periorms more like a perfect piston with no out of phase break up at the tip．The results are clear，smooth and transparent sound reproduction with high efficiency from 4 kHz to $20 \mathrm{kHz} \pm 2 \mathrm{~dB}$ and high power handling capacity of 70 Wrms ．The carefully designed face plate coupled with this opitmized dome provides exceptional linearity．Easily coupled with 2nd order crossover as shown Fig 1．Two crossover points are suggested for adequate power handling．

Le profil＂chainette＂de ce dôme textile procure une rigidité maximale au sommet du dôme．L＇ensemble mobile a donc une comportement proche du piston parfait，sans génération de modes parasites．It en résulte une reproduction sonore claire，dellicate et transparente．Le rendement est elevé $(92 \mathrm{~dB}$ de 4 kHz a $20 \mathrm{kHz} \pm 2 \mathrm{~dB}$ ，la tenue en puissance confortable（ $70 \mathrm{~W} \mathrm{rms)} .\mathrm{Ce} \mathrm{döme} \mathrm{"chainette"} \mathrm{associè} \mathrm{a} \mathrm{une}$ face soigneusement étudiée permet d＇obtenir une réponse d＇une linéarité exceptionnelle．Il peut être filtré au second ordre（ $12 \mathrm{~dB} / \mathrm{Oct})$ selon le shéma Fig 1．Deux fréquences de coupure sont proposées afin d＇obtenir la tenue en puissance adéquate．
