

Intégration IFP 207 KIT DÉDIÉ PEUGEOT 207

Kit éclaté 2 voies

- Solution “clé en main” pour “upgrader” l'installation d'origine
- Respect de la connectique PEUGEOT® d'origine
- Facilité de montage (- de 1h)
- Design du tweeter pour intégration parfaite à la planche de bord
- Son de qualité audiophile

CE QUI FAIT LA DIFFÉRENCE

- 100% plug and play
- Upgrade de l'installation d'origine
- Résultats significatifs même sans changer l'autoradio
- Montage rapide et simple (1 h maxi)
- Pack complet (outils et agrafes fournis)
- Vidéo d'aide à l'installation
- Possibilité de monter dans les emplacements “arrières” des haut parleurs coaxiaux IC130 / IC165 de la gamme intégration : prévoir achat de la connectique PSA
- Faible encombrement de ces produits
- Compatibilité et amélioration de l'acoustique d'origine
- Compatibilité pour montage dans PEUGEOT 307* et 308*
* avec petites adaptations techniques (isolation acoustique (307) et démontage du HP de la 308 par dérivetage)

CARACTÉRISTIQUES TECHNIQUES

Diamètre : 165 mm

Diamètre bobine : 25 mm

Hauteur bobine : 11,6 mm

Moteur : 85 mm

Tweeter TNB à dôme inversé en aluminium magnésium

Filtre : 6 / 18 dB/oct

Puissance max. : 140 Watts

Puissance RMS : 70 Watts

Sensibilité (2,83 V/1 m) : 92,7 dB

Bande passante du kit : 70 Hz – 25 kHz

Résistance woofer : 2,6 Ohms

IFP207 dedicated kit

2-way component kits

IFP207

100% DEDICATED TO REPLACING ORIGINAL EQUIPMENT

Launched in 2010, the new FOCAL program was built around three lines made to meet different needs: Elite, Performance and Integration. The Integration line meets the following demands: " Accessibility, Easy installation, Pleasure ".

In the last few years, the update of an audiobile system has become more and more complex (ergonomic loss of on-board computer control functions, remote screens, porting circuit into MOST technology, reduction of depth space for speakers...). However, our research has revealed continuing interest in audiophile sound quality, whatever the vehicle type or the driver's age.

How could we introduce an innovative, simple, efficient and perceptible method of delivering the best of sound?

Our R&D engineers have studied the question and have found a solution with the first dedicated kit of the Integration line: the IFP 207 kit.

This kit is made of 2-way component speakers (a pair of woofers and a pair of tweeters) dedicated, designed and made for one vehicle.

A philosophy built on enjoyment respect and accessibility to extraordinary quality!

This "plug and play" concept was made with regard to the original locations and the design created by the car manufacturer not only on the mechanic plan, but also on the acoustic plan (sound rendering improvement, taking into account the volumes and the inherent car interior restraints). After long months of studies, research, tests,

validations and listening sessions, the IFP 207 is born at last and now stands in a new market that's totally oriented towards pleasure and simplicity.

This first "ready-to-play" kit joins a promising program aimed at specific vehicles sold worldwide.

Without unveiling what will be the complete range of future Integration line dedicated kits, we can simply mention the most complete projects so far, such as the dedicated kits for Volkswagen Golf, BMW 1 and 3 Series, Japanese cars...

*IFP 207: 2-way component kit, user manual, video and specific tools for mounting.
Compatible tweeter mounting , integrable and with harmonious design.*

Because we make internationally recognized acoustic loudspeakers and because our R&D department innovates constantly to supply our product...
Experiment in your vehicle the acoustic enjoyment you can have in your living-room...

Plug & Play, 100 % Made in France !

Easy installation

By guaranteeing installation in less than an hour, keeping the original head unit, the IFP 207 brings a solution to all the Peugeot 207 owners who wish to discover the best of the audiophile sound. All the tools are supplied and a video shows the different steps of the installation. It couldn't be easier!

Compatibility

This 2-way component kit can be installed at the front instead of the original speakers of the Peugeot 207 3/5 doors CC/SW.

This IFP 207 kit is also compatible with the Peugeot 307* and Peugeot 308 (in 3/5 doors CC/SW versions).

* Important note: the speaker fixing in the Peugeot 307 is made inside the door trim. Acoustic insulation (such as FOCAL BAM) should be added to improve the result.

Listening

The woofer is the result of a long study on the efficiency/frequency compromise and offers intense but subtle bass reproduction. The aluminum inverted-dome tweeter, hallmark of the brand, provides neutral treble reproduction, which is accurate and reliable up to the highest frequencies.

Working on the tweeter formers produced an aesthetic match with the dashboard. Above all, thanks to its orientation and specific binding, the tweeter development greatly improved the original sound image (height, depth and width of soundstage). The result is a pure enveloping sound with great neutrality. Enjoy!

Installation 100% dedicated to Peugeot 207 in less than an hour.
Watch the demonstration video: <http://www.focal.com/fr/ifp207-video-install>

At our training workshops, we are proud to introduce the IFP 207, the first kit of the Integration line dedicated to the Peugeot 207 car.

Technical specifications

IFP207

Woofer	6 1/2" (165mm)
Cone	Polyglass®
Tweeter	Aluminum/magnesium inverted dome TNB
Chassis	ABS
Voice coil	1" (25mm)
Magnet	3 1/3" (85mm)
Sensitivity (2.83V/1m)	92.7db
Nom. impedance	2.6 Ohms
Frequency response	70Hz – 25kHz
Max. power	140W
Nom. power	70W RMS
Crossover	6/18dB/oct (4kHz)
Tweeter mounting	Molded for perfect integration in the original location and respect of the dashboard design
