

## Power Capacitors Car Audio

**Storage capacitors** are basic equipment for every high class car stereo. Because no audio system is better than its power supply!

The installation should be performed by an expert only. Also any follow-up works at the car's electrical system have to be performed with utmost caution (danger of short circuit).

**Mundorf HeadCaps** solving almost every car receiver problem caused by voltage issues, like:

- Flickering monitors
- Losing navigation data while start/stop processes
- Losing phone connections while start/stop processes

Additional Features:

- More detailed, subtle and powerful music reproduction
- Available as on-board computer friendly version MPC68i
- Relieves and protects batteries and alternators
- Follow-me-home-music

### MPowerSupply HeadCap

	Type	Rated Voltage [VDC]	Capacitance [ $\mu$ F]	Body $\varnothing$ * L [mm]	Wire $\varnothing$ * L [mm]	[€]
NEW	MPC68	25	68000	50 * 80	M5 (2Nm)	64,90
NEW	MPC68i	25	68000	50 * 90	M5 (2Nm)	79,90

**Mundorf PowerCaps** guarantee stabilized voltage directly at the amp. Consequently optimized for highest power pulse currents, our storage capacitors ensure extra power at the decisive moment. The result is a powerful and precise bass and a brilliant, open sound characteristics.

### MPowerSupply PowerCap

	Type	Rated Voltage [VDC]	Capacitance [F]	Body $\varnothing$ * L [mm]		[€]
	PCC100	18	1,0	75 * 225	M5 (2Nm)	179,90
	PCC150	18	1,5	75 * 225	M5 (2Nm)	229,90
